

CEO SUPPORT

Strengthening Financial Governance and Audit Readiness

SDM Consulting provides comprehensive CFO support services designed to enhance financial reporting accuracy, regulatory compliance and overall financial governance. We work closely with finance teams and executive leadership to deliver practical support that improves audit outcomes and builds long-term internal capability.

OUR CFO SUPPORT SERVICES

Financial Reporting Support

We assist with the preparation and review of Annual Financial Statements (AFS), including detailed notes, asset-related disclosures and draft journals. Our support ensures alignment between financial records, asset registers and the General Ledger, strengthening the integrity of financial reporting.

GRAP Compliance

Our specialists provide hands-on GRAP compliance support, guiding organisations through complex accounting standards and regulatory requirements. We assist with interpretation, implementation and ongoing compliance to ensure financial statements meet prescribed standards.

Audit Remediation

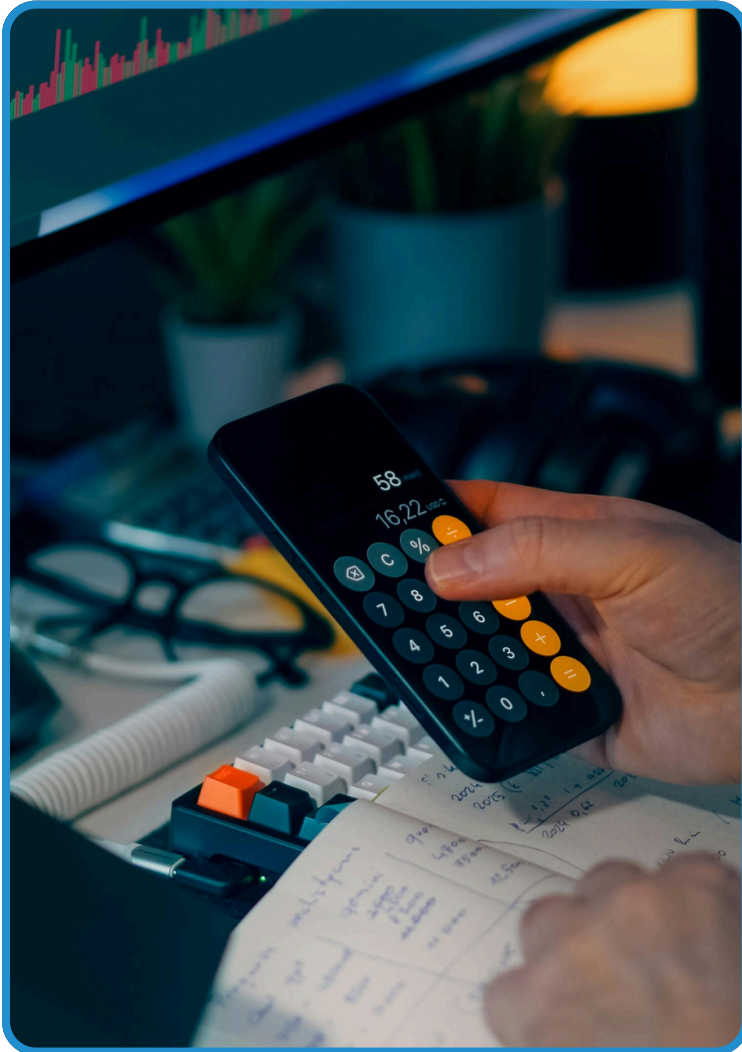

We support organisations in addressing audit findings through structured audit remediation plans. Our team works proactively to resolve historical issues, implement corrective actions and reduce repeat findings in future audit cycles.

Risk & SCM Compliance Reviews

We conduct risk assessments and Supply Chain Management (SCM) compliance reviews to identify gaps, weaknesses and non-compliance. Our reviews help strengthen internal controls, improve governance and support regulatory adherence.

CEO SUPPORT

Preparation of Audit Files

We prepare comprehensive audit files and supporting schedules to ensure a smooth and efficient audit process. Our approach improves audit readiness and enables finance teams to respond confidently to auditor requests.

Skills Transfer

A key component of our CFO support offering is skills transfer. Through hands-on engagement, training and mentoring, we equip internal teams with the knowledge and tools required to sustain compliance and financial excellence beyond our involvement.

Our Approach

SDM Consulting combines technical accounting expertise with practical public and private sector experience. Our collaborative approach ensures tailored solutions, measurable improvements and lasting value for finance teams and organisations.

VALUE WE DELIVER

- Improved audit outcomes
- Stronger financial governance and controls
- Reduced compliance risk
- Enhanced internal capability
- Reliable, accurate financial reporting
