

VALUATIONS

Accurate, Compliant Asset Valuations You Can Trust

SDM Consulting provides independent and compliant valuation services that support reliable financial reporting, audit requirements and informed decision-making. Our valuation methodologies are aligned with applicable accounting standards and regulatory frameworks, ensuring transparency, accuracy and defensible outcomes across all asset classes.

OUR VALUATION SERVICES:

Fair Value Assessments

We conduct fair value assessments for movable, immovable and infrastructure assets in line with relevant accounting standards. Our approach ensures that asset values accurately reflect current market conditions and operational realities.

Residual Value Reviews

Our residual value reviews evaluate the expected remaining value of assets at the end of their useful lives. This process improves depreciation accuracy, supports lifecycle planning and ensures compliance with financial reporting requirements.

Impairment Assessments

We perform impairment assessments to determine whether asset carrying values exceed their recoverable amounts. Where required, we assist in calculating impairment losses and preparing supporting documentation for financial reporting and audit purposes.

Valuations for Financial Reporting

Our valuation services support Annual Financial Statements (AFS) by providing accurate, well-documented valuation inputs and supporting schedules. We work closely with finance teams to ensure alignment with the General Ledger and asset registers.

VALUATIONS

Audit Support & Compliance

We provide hands-on support during audits by supplying valuation reports, assumptions and methodologies that withstand audit scrutiny. Our team assists in addressing audit queries and resolving valuation-related findings efficiently.

Our Approach

SDM Consulting combines technical valuation expertise with practical sector knowledge to deliver valuations that are robust, transparent and defensible. We apply consistent methodologies, detailed documentation and quality controls to ensure confidence in every valuation outcome.

VALUE WE DELIVER

- Accurate and compliant asset values
- Improved audit outcomes and reduced audit risk
- Reliable depreciation and impairment calculations
- Enhanced financial reporting integrity
- Informed asset and capital planning decisions
